Submits an estimate for Rs 54,100/- for the above work & seeks sanction on certain conditions

Flag F

1 Govt have in their order No L 4182-5/ml 125-32-4 dated 15-12-1932, sanctioned an estimate for Rs 11,500/- for the water Supply scheme of Madhugiri Town Mlty

2 On account of the execution of this scheme, Madhugiri Town is having a bore well near the T B and is worked out by 8 HP oil engine since 1934 and has a capacity of yield of 500 gallons per hour. There is the source of the water to the town and it is reported that there are 27 public taps at present

3 The municipal council, Madhugiri feels that the water supply at present is inadequate to meet the demands of the town having a population of about 8000 Hence they have prepared an estimate for Rs 54,100/- in consultation with the Sanitary Engineer for the following purposes —

i) for improving the water supply to the town ii) to provide for the purchase of a Pomona pump which could be worked both by oil and electricity

iii) for constructing a bigger tank having a capacity of 20,000 gallons and

iv) for increasing the no of public taps by another 25 and also for giving house connections

Serial No

4 Regarding the financing the work, the municipal council requests the Govt to sanction Rs 27,000/- as Govt grant and the remaining half in the shape of long term loan, free of interest

5 The Council proposes to repay the loan in 20 annual instalments by earmarking the revenue realised by levying water charges for house connections, which they expect would amount to Rs 4300/- annually

6 The D C recommends a favourable view of the case and sanction of both the loan & grant for the reasons that (i) Madhugiri is subjected to frequent drought due to insufficient rainfall (ii) the town is important on account of the location of various offices & courts and (iii) of the tendency on the part of the enterprising public to start small industries in recent days

7 For orders. Whether the estimate may not perhaps be sent to us in the first instance to the C E for Irrigation for scrutiny

8) Forwarded with compliments to the Chief Engineer for Irrigation for favour of scrutiny of the estimate in question

Returned with compliments, to the Secretary to Government, Revenue Department

2 The estimate in question has been scrutinised for Rs 54,100/-

advanced as a loan to the Municipality
The Municipality wants to know the rate of interest
This request cannot be conceded. The
loan will carry interest at 4 p.c. as in the case of other Municipalities
(2) Again it wants to repay the loan in
20 annual instalments. This is a long period
since the Municipality can consider that a sum
of Rs 4 30,000 would be realized annually by
levying enhanced rate. It should be possible for
the Municipality to repay the loan in
about ten years. The Municipality may
be asked to increase its resources further
Although this is a Municipality, its
financial condition is none too prosperous
since this area is subject to frequent
drought and consequently insufficient rainfall
The Scheme for improvement of water supply as
now received may be sanctioned

CIRCULATION NOTE.

Subject - Improvement of water supply to Madhugiri Town, Tumkur District

---

In their order No L 4182-5/M1 125-32-4 dated 15-12-'32 the Government sanctioned an estimate for Rs 11,500/- for the water supply scheme to Madhugiri Town

The scheme was executed and a bore-well was sunk near the Travellers' Bungalow It is worked by a 8 HP oil engine, since the year 1934 It gives an yield of 500 gallons per hour The water xx is supplied to the Town by means of 27 public taps from this source

The Municipal Council, Madhugiri feels that the water supply at present is inadequate to meet the growing demands of the town which has a population of about 8000 and the total quantity required per day at ten gallons per head per day would be 80,000 gallons. They have in consultation with the Sanitary Engineer, got an estimate prepared for Rs 54,100/- for the improvement of the water supply at the place

The scheme provides for.-

(1) The replacement of the present 8 HP oil engine with 15 HP

(2) Replacement of deep-well pump barrel with bigger size.

(3) Installing a centrifugal pump to discharge 16 gallons per minute against a head of 200 feet

(4) Laying new distribution pipe lines of 5575 feet

(5) Providing additional 23 public fountains and

(6) For constructing a bigger tank having a capacity of 20,000 gallons to serve as a balancing tank during the day and as a storage tank during the night.

Regarding the financing of the scheme, the Municipal Council requests that the expenditure may be met in equal proportions by the Government and the Municipal Council To meet its share of the cost, the Municipal Council requests for a loan of Rs.27,000/- free of interest and repayable in 20 annual instalments The revenue that would be realised by levying water charges for house connections which is estimated to amount to Rs 4,300/- annually is proposed to be earmarked for paying the loan instalments

The Deputy Commissioner, Tumkur District recommends sanction to the above proposals of the Municipal Council, as (1) Madhugiri is subject to frequent draught due to insufficient rainfall, (ii) the town is important on account of the location of various Government offices and (iii) that there is a tendency on the part of the enterprising public to start small industries

The estimate in question has been scrutinised and passed for Rs.54,100/- by the Chief Engineer for Irrigation

Madhugiri is an out of the way place and is subject to chronic draught Hence the improvement of water - supply to the town is important and urgent It is proposed to sanction the estimate, half the cost being given as an outright grant by the Government and the other half advanced as a loan repayable in 15 annual instalments, carrying interest at 4 per cent The Dewan and the Minister for Revenue & Communications have agreed to the above proposals

The papers have been orderd by the Dewan to be disposed of by circulation

Points for orders are -

(1) Sanctioning the above estimate for Rs.54,100/- for the improvement of water supply to Madhugiri Town

(2) Sanctioning the payment to the Municipality - of a grant of Rs.27,050/- by the Government from out of the water supply grants for 1947-48

and

(3) Sanctioning the grant of a loan of Rs.27,050/- to the Viddhugiri Town Municipality carrying interest at 4 per cent and repayable in 15 annual instalments

Final Note

Subject: These papers relate to the improvement of water supply to Madhugiri Town, Tumkur District.

The present source of water supply to Madhugiri Town is by means of a borewell. Since near the TB in the year 1984 it gives an yield of 500 gallons per hour and the water is supplied to the Town by means of 27 Public Taps.

The Municipal Council Madhugiri Health Officer has stated that the supply of water is inadequate to meet the growing demands of the town which has a population of about 8000 and the total quantity required per day at ten gallons per head per day would be 80000 gallons. In order to improve this position they have, in consultation with the Sanitary Engineer, got an estimate prepared for Rs 54,100/- therefor.

In regard to the financing of the scheme, the Municipal Council requested that the cost of the estimate may be met in equal proportions by the Govt and the Municipal Council. To enable them to meet their share of the cost, the Municipal Council requests the grant of from Govt of a loan of Rs 27000/- free of interest

and repayable in 20 annual instalments
The revenue ~~that would~~ of Rs 4300 is anticipated to be realised annually by levying water charges for house connections ~~estimated at Rs 4,300/- annually~~ and it is proposed to be earmarked for paying the loan instalments

The D C Trincomalee Dist recommends sanction to the above proposals of the WLC as (i) Madhuganga is subject to frequent drought due to insufficient rainfall, (ii) the town is an important one and also general centre of the location of various Govt offices are located there and (iii) there is also a tendency on the part of the local people, who are enterprising Public to start small industries there

The estimate in question has been scrutinised and passed for Rs 54,100/- by the C E for Irrigation

When the file came up to me, I noted as follows -

"The improvement of water supply of Madhuganga Town is important and urgent the estimate may be sanctioned Half the cost may be given as an outright grant by the Govt and the other half advanced as a loan, repayable in 15 annual instalments at 4% interest"

-on quotas

The estimate should therefore be sanctioned the expenditure being met as indicated above the Govt share of the cost will be met out of the Water Supply grant during the current year

The Dewan and the other ministers in Council agree to the above proposals and I solicit the gracious approval of His Highness thereto

9/8

Minister for Rev & Comms

9/8/47

(1) The replacement of the present 8 HP oil engine with 15 HP

(2) Replacement of deep-well pump barrel with bigger size

(3) Installing a centrifugal pump to discharge 16 gallons per minute against a head of 200 feet

(4) Laying new distribution pipe lines of 5575 feet

(5) Providing additional 23 public fountains and

(6) For constructing a bigger tank having a capacity of 20,000 gallons to serve as a balancing tank during the day and as a storage tank during the night

Regarding the financing of the scheme, the Municipal Council requests that the expenditure may be met in equal proportions by the Government and the Municipal Council To meet its share of the cost, the Municipal Council requests for a loan of Rs 27,000/- free of interest and repayable in 20 annual instalments The revenue that would be realised by levying water charges for house connections which is - estimated to amount to Rs 4,300/- annually is proposed to be earmarked for paying the loan instalments

The Deputy Commissioner, Tumkur District recommends sanction to the above proposals of the Municipal Council, as (1) Madhugiri is subject to frequent draught due to insufficient rainfall, (ii) the town is important on account of the location of various Government offices and (iii) that there is a tendency on the part of the enterprising public to start small industries

The estimate in question has been scrutinised and passed for Rs 54,100/- by the Chief Engineer for Irrigation

Madhugiri is an out of the way place and is subject to chronic draught Hence the improvement of water - supply to the town is important and urgent It is proposed to sanction the estimate, half the cost being given as an outright grant by the Government and the other half advanced as a loan repayable in 15 annual instalments, carrying interest at 4 per cent The Dewan and the Minister Revenue & Communications have agreed to the above proposals

The papers have been orderd by the Dewan to be disposed of by circulation

Points for orders are -

(1) Sanctioning the above estimate for Rs 54,100/- for the improvement of water supply to Madhugiri Town

(2) Sanctioning the payment to the Municipality - of a grant of Rs 27,050/- by the Government from out of the water supply grants for 1947-48

and

(3) Sanctioning the grant of a loan of Rs 27,050/- to the Addhugiri Town Municipality carrying interest at 4 per cent and repayable in 15 annual instalments

---

Secretary to Government,
Revenue Department

Final note by the Minister for Revenue and Communications

Subject — Improvement of water supply to Madhugiri Town, Tumkur District

---

1 The present source of water supply in Madhugiri Town is by means of a Borewell sunk near the Travellers' Bungalow in the year 1934 It gives an yield of 500 gallons per hour and the water issupplied therefrom to the Town by means of 27 public taps

2 The Madhugiri Town Municipal Council feel that the supply of water is inadequate to meet the growing demands of the town which has a population of about 8,000 and the total quantity required per day at ten gallons per head per day would be 80,000 gallons In order to improve this position they have, in consultation with the Sanitary Engineer, got an estimate prepared for Rs 54,100/- therefor

3 In regard to the financing of the scheme, the Municipal Council request that the cost of the estimate may be met in equal proportions by the Government and the Municipal Council to enable them to meet their share of the cost, and the Municipal Council request the grant from the Government of a loan of Rs 27,000/-, free of interest and repayable in twenty annual instalments A revenue of Rs 4,300/- is anticipated to be realised annually by levying water charges for house connections and it is proposed to be earmarked for paying the loan instalments

4 The Deputy Commissioner, Tumkur District recommends sanction to the above proposals of the Municipal Council as (1) Madhugiri is subject to frequent draught due to insufficient rainfall, (2) the town is an important one and several Government Offices are located at the place and (3) that there is also a tendency on the part of the local people, who are enterprising to start small industries there

5 The estimate in question has been scrutinised and passed for Rs 54,100/- by the Chief Engineer for Irrigation

6 When the file came up to me, I minuted as follows

> "The improvement of water supply of Madhugiri Town is important and urgent The estimate may be sanctioned Half the cost may be given as an out-right grant by the Government and the other half advanced as a loan, re-

(F N —contn)

repayable in 15 annual instalments and at 4 per cent interest"

7 The estimate in question will therefore be sanctioned, the expenditure being met as indicated above The Government share of the cost will be met out of the Water Supply grant during the current year

8 The Dewan and the other Ministers in Council agree to the above proposals and I solicit the gracious approval of His Highness thereto

BANGALORE,
11-8-1947

MINISTER FOR REVENUE
& COMMUNICATIONS

Submitted to His Highness

I submit herewith a Final Note by the Minister for Revenue and Communications on the proposal to sanction an estimate for Rs 54,100/- for improvement of water supply to Madhugiri Town, Tumkur District, for the gracious approval of His Highness

puty Commissioner,
Tumkur District, Tumkur

To

Mallaradhya, Esq , M.A ,
Secretary to the Govt of Mysore,
Revenue Dept., Bangalore.

Sir,

With reference to your letter No L 1915-23 dated 1st August 1946 and subsequent reminder dated 2-11-1946 regarding the improvement of water supply scheme to Madhugiri town, I have the honor to state that consequent on the execution of a scheme costing Rs 13,290/- which was sanctioned in G O No L 4182-5/M1 125-32-4 dated 15-12-1932 Madhugiri town is having a bore-well near the premises of Travellers' Bungalow and worked out by 8 H P oil engine since 1934 which has a capacity to yield 500 gallons per hour This is the source of water supply to the town and it is reported that there are 27 public taps at present The Council feels that the water supply at present is inadequate to meet the demands of the town having a population of about 8000 Hence they have prepared an estimate for Rs 54,100/- in consultation with the Sanitary Engineer for improving the water supply to the town The new estimate for Rs 54,100/- prepared by the Sanitary Engineer provides for the purchase of a Pomona pump which could be worked both by oil and electricity, for constructing a bigger tank having a capacity of 20,000 gallons and for increasing public taps by another 25 and also for giving house connections

2 As regards the funds for the scheme the Council have resolved to request the Government to sanction Rs 27,000/- as grant and the remaining half in the shape of long term loan free of interest

PTO

The Council proposes to repay the loan by levying water charges for house connections. They expect to realise about Rs 4300/- annually which will be earmarked for repayment for the loan in 20 annual instalments

3 The Government are aware that Madhugiri is subjected to frequent drought due to insufficient rainfall The town is important on account of the location of various offices and courts and of late there is a tendency on the part of the enterprising public to start small industries I am therefore of opinion that the prayer of the Municipal Council may be viewed favourably and both the loan and the grant sanctioned.

The Municipal President's letter together with its enclosures in original is submitted herewith

I have the honor to be,
sir,
Your most obedient servant,

Deputy Commissioner,
Tumkur District.

Sir,

Subject Improving water supply to Madhugiri Town

With reference to your ~~H.O~~ No M1 2565/29 5 47 on ~~the~~ above subject, I am directed to request you to be so good as to furnish information on the following points at once:

1) ~~Is~~ It possible for the pump to work for 20 hours every day and if so, in how many shifts?

2) During what hours will the pumping be done?

3) what will be the quantity of water to be pumped after 8 or 9 years?

4) where will it be stored?
and 5) Will a tank of 20,000 gallons capacity be adequate for the purpose?

Sir,

Subject Improving Water Supply to Machuhiri Town

With reference to your letter No L 16621 dated 2-6-1947, requesting me to furnish information on the points raised in the above letter, I have the honour to state as follows

1 It is possible to work the pump for 20 hours every day The pumping will have to be done in two shifts of 10 hours each It is, however, better to work the pump for lesser number of hours in the interest of the life of the machinery

2 The pumping will have to be done from 4 a m to 12 P M ~~noon~~ in the night

3 The quantity of water pumped after 9 p m and between 9 p m and 6 a m will be 20,000 gallons (5 hours pumping)

4 This water can be stored in the R C C Tank of 20,000 gallons capacity

5 The 20,000 gallons capacity tank will serve as a balancing tank during the day and as a storage tank during the night The tank will be sufficient for the purpose as there is an existing pressed steel tank of 4,800 gallons capacity already

I have the honour to be,
Sir,
Your most obedient servant,

Sanitary Engineer (on leave)

PROCEEDINGS OF THE GOVERNMENT OF HIS HIGHNESS
THE MAHARAJA OF MYSORE

LAD -

Government Order No L 4182-5/Ml 125-32-4 dated the 16th December 1932, sanctioning an estimate for Rs 11,500/- for the water supply scheme to Madhugiri Town

2) Letter No.AC-C 881/46-47 dated 13-11-1946, from the Deputy Commissioner, Tumkur District, forwarding an estimate for Rs 54,100/-, for the improvement of water supply to Madhugiri Town

3) U O Note No 2367/S dated the 17th May 1947 from the Chief Engineer for Irrigation in Mysore, on the subject.

ORDER No L 3234-6 Ml 45-46-51

Dated, Bangalore, 26th August 1947
28th

The present source of water supply in Madhugiri Town is by means of a bore-well sunk near the T B in the year 1934 It gives an yield of 800 gallons per hour and the water is supplied therefrom to the town by means of 27 public taps

The Madhugiri Town Municipal Council feel that the supply of water is inadequate to meet the growing demands of the town which has a population of about 6,000 and the total quantity required per day at ten gallons per head per day would be 60,000 gallons. In order to improve this position, they have, in consultation with the Sanitary Engineer, got an estimate prepared for Rs.54,100/-

In regard to the financing of the scheme, the Municipal Council request that the cost of the estimate may be met by the Government and the Municipal Council in equal proportions To enable them to meet their share of the cost, the Municipal Council request the grant of a loan of Rs 27,000/-, free of interest by the Government and repayable in twenty annual instalments A revenue of Rs 4,300/- is anticipated to be realised annually by levying water charges for house connections and it is proposed to be earmarked for paying the loan instalmen

The Deputy Commissioner, Tumkur District requests sanction to the above proposals of the Municipal Council as (1) Madhugiri is subject to frequent draught due to insufficient

(continued)

insufficient xxxx rainfall, (2) the town is an important one and several Government Offices are located at the place and (3) that there is also a tendency on the part of the local people, who are enterprising to start small Industries there.

The estimate in question has been scrutinised and passed for Rs 54,100/- by the Chief Engineer for Irrigation.

Government consider that the improvement of water supply of Madhugiri town is important and urgent. The estimate for Rs.54,100/- for the work in question, is therefore sanctioned. The cost of the work will be met by the Government and the Municipal Council in equal proportions.

The Government share of the cost, viz., Rs.27,050/- which will be an outright grant, will be met out of the provision made under "Water Supply Grants" in the current year's State Budget.

As the Madhugiri Town Municipal Council is not in a position to pay its share of the cost immediately, sanction is also accorded to the grant to it of a loan of Rs.27,050/- carrying interest at 4% and repayable in fifteen annual instalments.

The Deputy Commissioner, Tumkur District is requested to see that necessary provision is made in the future budgets of the Municipal Council for the payment of the loan instalments regularly. The Chief Engineer for Irrigation is requested to arrange for the above work being started immediately and completed expeditiously.

By Command of the Governor,
[illegible]

To

The Deputy Commissioner, Tumkur District with records.
The Comptroller to Government thro' the Financial Secretary.
The Chief Engineer for Irrigation in Mysore.

PS/S
